

Geotechnical investigations at Nepean River, Penrith from Monday 1 December

The NSW Government is building a new pedestrian and cyclist bridge spanning the Nepean River between Penrith and Emu Plains.

Roads and Maritime Services will carry out geotechnical investigations from Monday 1 December to further inform the design for the Nepean River Green Bridge project.

This work will be carried out between **7am and 6pm** from **Monday to Friday** and on **Saturdays** from **8am to 1pm** from **Monday 1 December to Friday 19 December**, weather permitting.

Roads and Maritime contractors will use a truck-mounted drill rig to drill three boreholes on the western side and three boreholes on the eastern side of the river. In addition to this work, one test pit will also be excavated on the western side of the river. Additional boreholes will be drilled in the river bed using a truck-mounted drill rig on a barge.

Pedestrian access will be maintained while drilling work is carried out along The Great River Walk on the eastern side of the river.

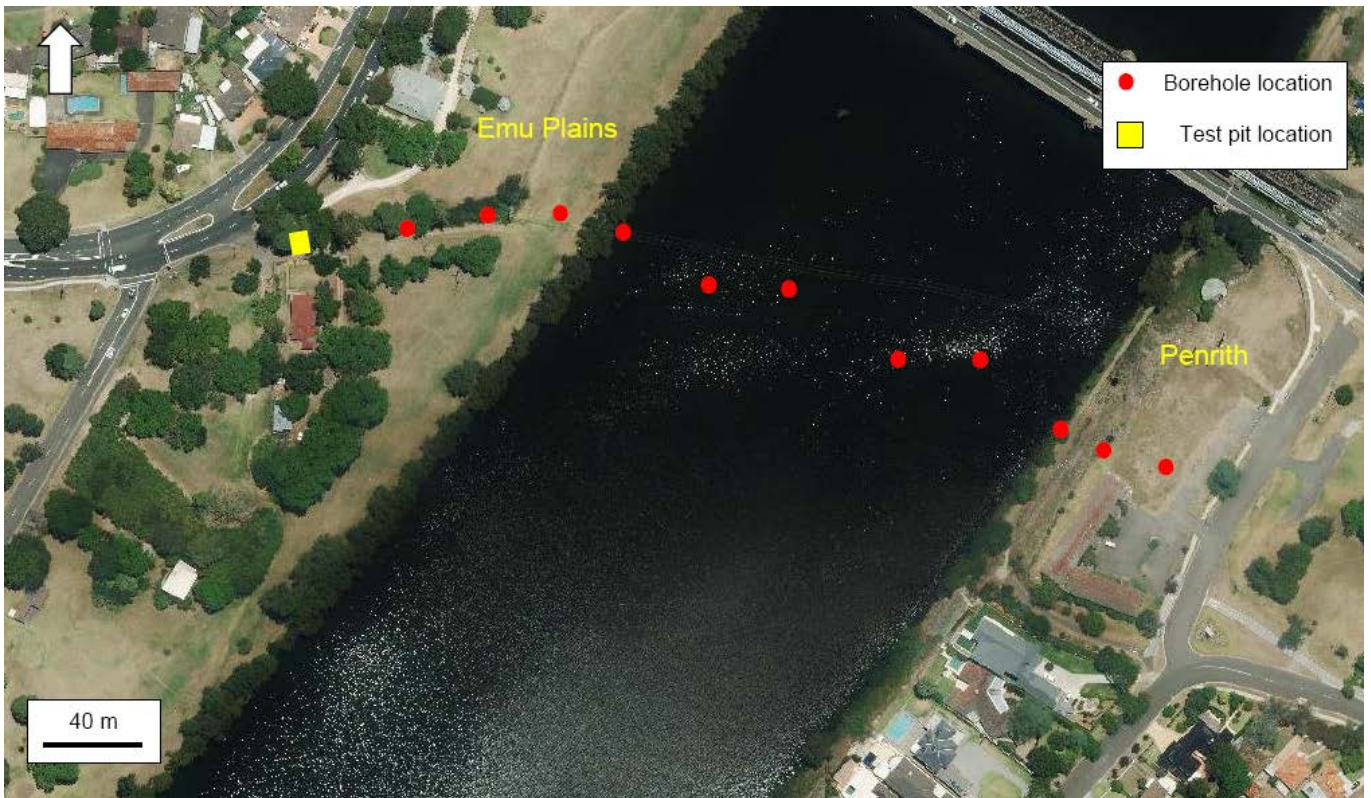

A half day closure of the Tench Reserve boat ramp in Tench Avenue, Jamiesontown will be required to place the barge on the river on **Monday 1 December** from **10:30am to 3:30pm**. Maps have been provided overleaf of where this work will be done and the location of the boat ramp to be temporarily closed.

There may be some noise associated with this work, but every effort will be made to minimise the impact on residents and businesses. This work has been assessed and approved under a minor works Review of Environmental Factors for geotechnical investigations in and along the Nepean River.

We apologise for any inconvenience this work may cause and appreciate the patience of residents and water users. Up to date information, including any date changes and walk way closures will be displayed on notices around the work area.

Update on the Review of Environmental Factors

We are currently preparing a submissions report in response to feedback we received during the display of the proposed design and Review of Environmental Factors earlier this year. This report will include details of changes made as a result of feedback. The Submissions Report will be made available to the community once finalised.

Drilling to be carried out in Nepean River at Penrith / Emu Plains
